Bài 2. Hướng đối tượng

Bước 1. Tạo cơ sở dữ liệu udn. Đã gửi ở lab 10

Bước 2. Tạo lớp tệp database.class.php như sau

```
<?php
     class Dao{
         private $con;
         function __construct($user,$pass,$db)
             $host=$_SERVER['SERVER_NAME'];
             $this->con=mysqli_connect($host,$user,$pass,$db);
         }
10
         public function query($sql){
             mysqli_query($this->con,"set names 'utf8'");
11
12
             $rs=mysqli_query($this->con,$sql);
13
             return $rs;
14
15
         function table($sql,$header){
             $rs=$this->query($sq1);
17
             $fieldinfo=mysqli_fetch_fields($rs);
             $str="";
18
             foreach ($fieldinfo as $val){
19
20
                 $name=$val->name;
21
                 $str.="".$name."";
22
             $str.="";
23
24
25
             while($r=mysqli_fetch_array($rs)){
                 $str.="";
                 foreach ($fieldinfo as $val){
28
                     $name=$val->name;
29
                     $str.="".$r[$name]."";";
30
31
                 $str.="";
32
             $str.="";
             echo "<h3>{$header}</h3>";
             echo $str;
36
         }
     ?>
```

Bước 3. Tạo tệp index.php như sau

<html>

<!doctype html>

<head>

<meta charset="UTF-8">

```
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>OOP with PHP</title>
link href="style.css" rel="stylesheet"></link>
```

```
<script>
 function ajax(){
      var obj=document.getElementById("info");
      obj.style.display="block";
      value=document.getElementById("chon").value;
      var xml=new XMLHttpRequest();
      xml.onreadystatechange=function(){
           if(xml.readyState==4){
               obj.innerHTML=xml.responseText;
      url="showTable.php?chon="+value;
      xml.open("GET",url,false);
      xml.send();
 </script>
</head>
<body>
<h1>OOP with PHP</h1>
<select id="chon" onChange="ajax();">
      <option value="">-->-Chon-<--</option>
      <option value="giaovien">Giáo viên</option>
      <option value="sinhvien">Sinh viên</option>
      <option value="hocphan">Hoc phan
<select>
<hr>
<div id="info" style="display:none;"></div>
</body>
</html>
```

Bước 4. Tạo tệp showTable.php như sau

 $\hspace{1cm} \fbox{ C:$\xampp\htdocs\ajax\ooop_database\showTable.php (ajax) - Sublime\ Text } \\$

```
File Edit Selection Find View Goto Tools Project Preferences Help
  ▶ login
                                               showTable.php
  <?php
     database.class.php
                             $op=$_GET["chon"];
     /* dct.sql
                             if($op!=""){
     <> index.html
                                   include("database.class.php");
                         4
     showTable.php
                                   $dao=new Dao("root","","udn");
                         5
     /* style.css
  6
    pagination-ajax-mas
                                   $sql="select * from {$op}";
